Hi Kaela-

We have discussed adding open space on the roof, but that is the only change we are contemplating...everything else about the building is the same. Can we put a placeholder on the open space numbers as we work through the roof design?

Thanks,
Tyler

[EXTERNAL]
Hi Tyler,

We'll need the updated plan set by COB tomorrow, so we can incorporate them in our Part A submittal for this Friday.

Thanks!
Kaela

Subject: Stevenson Updated Plan Set

Hi Tyler,

Could you please send us the updated Stevenson plan set (black and white version)? The last version we have is from 5/20/21. We'll need to update the figures in the Project Description with the latest plans showing any changes to the design, including changes made to the balconies.

Also, could you please provide an updated anticipated construction schedule? The Project Description currently says that construction would begin in 2021 and be completed by 2024, requiring approximately 36 months of construction.

Thank you!
Kaela
