Subject: 469 Stevenson Street

Hello Anna,

As we discussed this morning, the air quality and noise scopes have been folded into the initial study scope of work per edits from Planning. Therefore, separate scopes are not needed for these topics. Per our conversation, we expect the second draft of the scope of work before next Wednesday along with the GHG Checklist.

We have a site visit scheduled for next Wednesday, September 19 from 3:00-4:00pm. I would like to use this site visit as a opportunity to check in instead of our regular meeting on September 26, which I would like to cancel as I will be out of the office. Please bring any questions you may have to that meeting.

Thanks,

Lana Wong
